

CAPABILITIES STATEMENT

Inceptima is a **Woman Owned, Minority, Small Disadvantaged Business** that provides training and program management services. In a world driven by Big data analytics and Artificial Intelligence (AI), our systems are becoming more and more complex. The 4th Industrial Revolution (4IR) comes with new challenges and new ways of thinking are required to manage them. We work with our industry partners to help our clients develop new and sophisticated ways to manage and solve organizational challenges. Our services cover many business areas both in the United States and Overseas including Technology Management, Economic Development, Climate Change, and Workforce Development

Service Areas

Program Design, Management, and Evaluation
Climate Change Resilience, Mitigation, and Adaptation Services
Decentralized Technology and Environmental Awareness Training and Advisory
Systems Engineering Systemic Program Design and Leadership Training

Past Performance

Department of Commerce (DOC), U.S. Census Bureau: Training and Systems Engineering Support

- Inceptima joined the U.S Census Bureau, Office of Systems Engineering to help identify, develop, and codify Enterprise Non-Functional Requirements. Non-Functional Requirements (NFRs) are requirements that specify criteria that can be used to judge the operation of a system, rather than specific behaviors such as the maintainability, reliability, and availability of a system.

USAID: Center for Faith and Opportunity Initiatives (CFOI): Program Management Support

- Inceptima worked in collaboration with RTI, to develop content and coordinate webinars to support USAID staff in different regions. The webinars emphasized the importance of engaging faith- based organizations during USAID programming and project implementation

International Road Federation -United Arab Emirates (UAE): Planning, Logistics, and Management

- Inceptima supported IRF on Logistics, Planning and Representation in the Middle East and North Africa Regional Conference (MERC) on the role of sustainable transportation policy in economic development, public-private partnerships, social empowerment, and accountability
